

## Larsen H-20 bailer

Quality used bailing machine is used for attaching wire bails automatically to round cans which have already been provided with ears, type Larsen 20-S, at an earlier stage in production. The following functions are fully automatic: 1. Separation of the cans which are transported by the customer's own feeding belt (standing one behind the other in a queue, with random orientation of ears); 2. Search for, identification and positioning of ears. 3. Separation and infeed of positioned, pre-cut wires as well as forming and attaching the bail.

### Technical specifications

<b>CazProductNumber</b>	4972
<b>Name</b>	Larsen H-20
<b>Function(s)</b>	bailer
<b>Can height min</b>	100 mm
<b>Can height max</b>	350 mm
<b>Can end diameter min</b>	142 mm
<b>Can end diameter max</b>	267 mm
<b>Speed upto</b>	40 cans per minute
