

Ocsam TPMDX

robot

Pre-owned Ocsam Cepak transfer system feeding the blank magazine of the canbody welder with cut blanks from the slitter. Thanks to its substantial reserve capacity for blanks, the transfer unit can compensate for short upstream or downstream production interruptions, thus guaranteeing non-stop operation of the production line.

Technical specifications

CazProductNumber CPN	6666
Name	Ocsam TPMDX
Tooling	127*163 mm
Year of Construction	2018
Can shape	round
